WORK EXPERIENCE

Fullstack Developer (Intern → Part Time)

December 2025 — Present

Sunshine Multi Plus Corporation

Aurora Boulevard, Quezon City

- Developed Inventory, Sales, and Purchasing modules for a desktop-based Enterprise Resource Planning System
- Designed and developed the Item Entry module, incorporating validation rules, automatic item code generation, and image upload functionality.
- Created a Canvass Sheet module with features such as order quantity validation, price validity checks, and canvass-based purchase order generation with dynamic cost computation.
- Improved the Sales Quotation module, adding support for templated and multi-version quotations and real-time collaboration features for specific users.
- Implemented and optimized views and stored procedures to ensure efficient and reliable data operations.
- Developed modular backend services and RESTful APIs using Go (Golang) with MVC architecture, ORM integration and database migration support.
- Designed and maintained SQL Server database schemas, ensuring data integrity and optimized performance.
- Integrated Redis caching to improve application responsiveness and reduce database load.
- Maintained clean, modular, and well-documented code while following Git and GitHub best practices.
- Collaborated in an Agile environment, actively participating in daily standups, sprint planning, and team retrospectives to align development goals and ensure timely delivery.
- Analyzed client requirements and translated abstract ideas into clear, functional plans
- Participated in regular team meetings, contributing ideas to enhance development workflows, user experience, and overall system performance.
- Created detailed flowcharts, logic guides, and checklists to guide development
- Conducted debugging and testing, ensuring everything aligned with the original design
- Gained hands-on experience in problem-solving, communication, and team management
- Assisted in the onboarding of new interns, providing system walkthroughs, project overviews, and guidance on technical setup and best practices.

PROJECTS

E-Kumpas: Translating Text into Filipino Sign Language using Animations

June 2024 — November 2024

- Flutter, Dart, MongoDB, Node.js, Express, Realm
- Developed a mobile app to facilitate Filipino Sign Language (FSL) translation using animation.
- Designed for the Philippine Registry of Interpreters for the Deaf, the app helps users learn and practice FSL with levels/categories and a user-friendly interface.
 - Features: Offline/Online modes, translation page, FSL levels/categories, dark/light themes, favorites, feedback, and update notifications.

Webdonasyon: Web-based donation management system for One Step Organization.

May 2022 — August 2022

- ERN Stack (MongoDB, Express, React, Node.js)
- Created a full-stack web application to streamline online donation processes for NGOs (specifically OneStep).
- The system makes it easier for donors and organizations to manage donations and schedules.
 - Features: Dashboard, PayPal Integration, Donor/User Management, Event Management, Donation and Appointment Pages, and an Organizational Calendar.

EDUCATION

National University Manila

Aug 2022 — June 2025

Bachelor of Science in Information Technology Major in Mobile and Web Applications

Sampaloc, Manila

- Dean's Lister

- President's Lister
- Dean's Lister

SKILLS

- **Frontend:** Windows Forms (C#), Flutter (Dart), ReactJS
- **Backend:** Go (Fiber), NodeJS, ExpressJS
- **Database:** SQL Server, MongoDB, Firebase
- **Others:** Redis, Realm, REST APIs, WebSocket, GitHub, Postman, Trello, Figma, Material UI, Tailwind CSS

OBJECTIVE

A dedicated and adaptable developer eager to contribute to real-world software solutions in a professional setting. With a strong foundation in both frontend and backend development, I aim to bring value to dynamic teams, solve problems through code, and grow continuously as a tech professional in a fast-paced and innovative environment.
